Assessment of PD-L1/PD-1: If, When, Why and How

Synopsis

PD-L1 is the only FDA approved assay as a companion diagnostic for PD-1 axis immune therapy. Every drug and every organ site seems to have its own assay and its own scoring system. Here we look at the assays, the scoring systems and the predictive value of the tests. Finally, we will discuss other assays that may improve the current companion diagnostic landscape for immune-oncology.
