

The health and safety of San Antonio Breast Cancer Symposium attendees, exhibitors, and staff is a top priority. We are working with the Henry B. Gonzalez Convention Center to ensure adherence to federal, state and local regulations and guidance. We look forward to safely rejoining our colleagues at SABCS in San Antonio on December 7-10.

The situation with COVID-19 is still an evolving one, however we are looking forward to an exciting in person meeting December 7-10, 2021. The officials in San Antonio have been gradually increasing capacity limits as more people are fully vaccinated and local infection rates decline. This is all very encouraging news for SABCS!

Here's what you need to know:

- Fully vaccinated people can resume activities without wearing a mask or physically distancing.
- We strongly encourage unvaccinated individuals to wear a mask. Masks will be available should a participant forget theirs. Masks should only be removed when actively eating or drinking.
- Enhanced sanitation—SABCS will work with venue partners to ensure highest standard of hygiene and cleanliness throughout the Henry B. Gonzalez Convention Center
- Increased hand sanitization stations throughout the event.

SABCS reserves the right to update this plan, as necessary, in accordance with science and any new guidance issued by federal and state authorities.

Here are some additional steps we are taking:

- SABCS follows guidelines from the Centers for Disease Control and Prevention (CDC) and to align with Texas Governor Abbott's executive order dated May 18, 2021 <https://www.cdc.gov/coronavirus>
- The SABCS team is working closely with our host venue to monitor local infection rates and capacity limits in San Antonio. SABCS plans will be in response to these and other relevant data, as well as to guidance from the CDC.

As more details become available and decisions are made, they will be posted on our website sabcs.org.
