Abstract Categories

- Adverse Effects of Cancer Treatment and Symptom Management
- Animal and ex vivo Models
- Artificial Intelligence, Computational Biology, and Systems Biology
- Behavioral and Population Science
- Breast Cancer Risk, Genetics, and Prevention
- Breast Cancer: Early Stage - HER2+
- Breast Cancer: Early Stage - Hormone Receptor Positive
- Breast Cancer: Early Stage - Other
- Breast Cancer: Early Stage - Triple Negative
- Breast Cancer: Metastatic - HER2+
- Breast Cancer: Metastatic - Hormone Receptor Positive
- Breast Cancer: Metastatic - Other
- Breast Cancer: Metastatic - Triple Negative
- Cancer Health Disparities
- Cancer Survivorship and Quality of Life
- Clinical Biomarkers, Translational Research, and Precision Medicine
- Clinical Case Studies (not available for late breaking abstracts)
- Drug Discovery, Design, and Delivery
- Experimental Therapeutics and Early Phase Trials
- Imaging / Early Detection
• Mechanisms of Resistance
• Molecular and Cell Tumor Biology
• Ongoing Clinical Trials (see rules below)
• Pathology
• Policy, Access to Care, Health Outcomes and Cancer Care Delivery
• Radiation Oncology
• Real-World Data and Real-World Evidence
• Surgery
• Tumor Microenvironment, Immunology, and Angiogenesis
• Other
